Total for all asbestos related diseases	30	13	37	80	43%

<sup>1</sup> Asbestos disease was at least a significant contributing factor in the death

<sup>2</sup> "Mineworker" includes subcontracted employees

<sup>3</sup> Includes laryngeal and GI cancers (esophageal, stomach, colon, rectum)  
per Selikoff and Seidman (1992)

<sup>4</sup> "Community" means those who are not mineworkers or family members of mineworkers.

\* "Community" includes 24 undetermined as to family member or community status

<sup>5</sup> "ARPD" asbestos related pleural disease

<sup>6</sup> On the death certificate, any mention of asbestos disease as a contributing  
factor in the death is considered as an asbestos disease death, per Sullivan (2007).
